

TECHNCIAL NOTE no.: 55

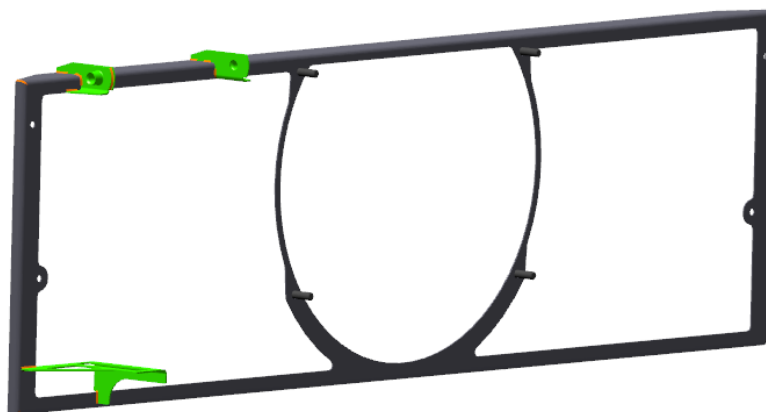

Product:	Engine Fan Support
Part number:	5FR121207B
To:	Cupra Leon VZ TCR
Date:	28/05/2024

Dear customer,

We have received reports of a radiator breakage after a frontal crash of a car model CUPRA LEON VZ TCR. It is always difficult to assess how serious the impact was in relation to the damages caused.

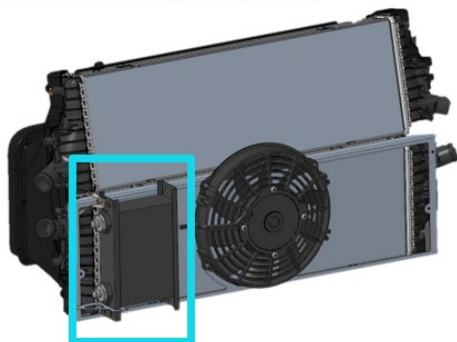

As prevention to avoid further engine radiator punctures, we propose the following actions:

1. Customers to remove the old gearbox radiator supports (**in green**) in all existing CUPRA LEON VZ TCR cars. The lower one is the critical one.

2. CUPRA to modify the design. Soon we'll announce the availability of a renewed engine fan support. This new one, will be suitable for all cars models.

CUPRA **LEON COMPETICION** gearbox radiator position
